TORQTITE Adjustable Torque Wrenches Flaretite Inc. | Circle 542

Flaretite's new adjustable open-end torque wrenches allow all tube and hose ends to be precisely tightened to their correct torque recommendations. These new wrenches fill a void across all industries where fitting connections are used. Developed to compliment Flaretite's patented flared seals for 30, 37, and 45 degree flared fittings, these new wrenches are used by quality conscious mechanics in hydraulics, pneumatics, pharmaceutical, chemical, medical and environmental industries. Torqtite wrench benefits:

- Adjustable torque settings from 10 - 420 Nm (8 - 310 lb-ft)
- Adjustable Hex size (jaw opening) from 7/16" thru 3"
- Low profile, reversible, spanner design
- Precision quality design with +/- 4% accuracy
- Supplied with torque rating tables for most common fittings

Unique Protective Covers Conduit Covers | Circle 545

Designed to be inherently flexible and adaptive, the Conduit Cover product line provides alternative solutions to covering and protecting the ends of all types of open hoses, tubes, lines, pipes, and fittings from solenoid valve connectors to split flange fittings. Although considered the universal cap and plug, the Conduit Cover is extremely effective when used as a storage and masking device. Available in three sizes, Conduit Covers protect ends up to 7 3/4 in diameter.

Star Servovalves K+S Services | Circle 547

Star Hydraulics Ltd. designs and manufactures Servovalves, which can act as direct drop-in replacements for many existing manufacturers valves. These valves incorporate Star's "Sapphire Technology™", which guarantees to eliminate the traditional ball wear and orifice erosion seen in many other Servovalves.
